Notes: Finally ... finally ... FINALLY ... after months of anticipation,

the dub of Ghost in the Shell hits this month, and you can expect

it will sell big! If the schedule holds, the subtitled version will be

out late next month. Another long awaited video release finally happens

this month: the cult classic Heavy Metal finally is out on tape; a laserdisc

will follow next month.

A new supplier has hit the scene, and we've got 'em. Critical Mass Video's

first release, Weather Report Girl Part 1, will be out in early July -- it's

a scream. Slayers also arrives this month from Sculptors, and word has it

that this one is a real sleeper. Miku ends this month as well. In other news,

AD Vision has placed Evangellion on their release schedule starting in

August. The mystery of whether Anime-18 was going to release the fourth

Urotsuki Doji series has been solved: they've got it, and we should see it

this fall.
